

# “Cyprus National Guard Digital Transformation in the Age of Artificial Intelligence War”

**11-12 November 2025, Pavilion Hall, Nicosia, Cyprus**

## DRAFT AGENDA

|                    |  |
|--------------------|--|
| <b>08:00-09:00</b> | <b>DAY 1</b><br><b>Morning Coffee - Registration</b>   |
| <b>09:00</b>       | Welcome and Administrative details by the organizers   |
| <b>09:10</b>       | Opening address by Cyprus Ministry of Defense Officials  |
| <b>09:30</b>       | Digital Transformation: Rapidly Evolving Threats Require Quickly Fielded Solutions, Moving Towards Digitally Empowered Military Forces     |
| <b>10:00</b>       | C4ISR in the Modern Age: Adapting to the Evolving Battlefield  |
| <b>10:30</b>       | Artificial Intelligence  |
| <b>11:00</b>       | Armored Vehicles in the Digital Battlefield  |
| <b>11:30</b>       | Unmanned Aerial Systems for Intelligence, Reconnaissance and Surveillance: Powering military operations and informing decision-making      |
| <b>12:00</b>       | Highly Capable and Versatile Multi-mission Surface Units and Patrol Boats in the digital Battlefield                                       |
| <b>12:30</b>       | Satellite Communications   |
| <b>13:00-14:00</b> | <b>Lunch</b>   |
| <b>14:00</b>       | Air Defence Systems  |
| <b>14:30</b>       | Versatile helicopters able to perform a variety of pivotal functions with hybrid warfare set to play an increasing role in future conflict |
| <b>15:00</b>       | Electronic Warfare   |
| <b>15:30</b>       | <b>End of DAY 1</b>  |

|                    |   |
|--------------------|---|
| <b>08:00-09:00</b> | <b>DAY 2</b><br><b>Morning Coffee - Registration</b>  |
| <b>09:00</b>       | Unmanned Land Systems   |
| <b>09:30</b>       | Responsive C4ISR capability meeting the full spectrum of the National Guard operational demands in 21st Century Security network-centric architecture |
| <b>10:00</b>       | Counter Drones Systems  |
| <b>10:30</b>       | Multi-UAV Mission Planning for Monitoring Critical Infrastructures  |
| <b>11:00</b>       | Unmanned combat aerial vehicles   |
| <b>11:30</b>       | Considering Failures and Cyberattacks   |
| <b>12:00</b>       | Mobile all-weather air defense systems designed to intercept and destroy short-range targets and artillery shells                                     |
| <b>12:30</b>       | Soldiers in the Digital Battlefield   |
| <b>13:00-14:00</b> | <b>Lunch</b>  |
| <b>14:00</b>       | C4ISR in Homeland Security  |
| <b>14:30</b>       | Night Vision and Thermal images sensors to enable surveillance and situational awareness  |
| <b>15:00</b>       | Unmanned surface vessels and underwater vehicles  |
| <b>15:30</b>       | Loitering munitions are integrated into the greater strategy of the war   |
| <b>16:00</b>       | <b>End of DAY 2 – Conclusions</b>   |
